

Contents

Part One	The Language and Approach of Science	1
Chapter 1	Science and the Scientific Approach	3
	Science and Common Sense	4
	Four Methods of Knowing	6
	Science and Its Functions	8
	The Aims of Science, Scientific Explanation, and Theory	11
	Scientific Research: A Definition	14
	The Scientific Approach	15
	<i>Problem-Obstacle-Idea</i>	15
	<i>Hypothesis</i>	15
	<i>Reasoning-Deduction</i>	15
	<i>Observation-Test-Experiment</i>	17
	Chapter Summary	19
	Study Suggestions	20
Chapter 2	Problems and Hypotheses	23
	Problems	24
	Criteria of Problems and Problem Statements	25
	Hypotheses	26
	The Importance of Problems and Hypotheses	27
	Virtues of Problems and Hypotheses	28
	Problems, Values, and Definitions	30
	Generality and Specificity of Problems and Hypotheses	31
	The Multivariable Nature of Behavioral Research and Problems	32
	Concluding Remarks: The Special Power of Hypotheses	33
	Chapter Summary	34
	Study Suggestions	35
Chapter 3	Constructs, Variables, and Definitions	41
	Concepts and Constructs	42
	Variables	42
	Constitutive and Operational Definitions of Constructs and Variables	43
	Types of Variables	48
	<i>Independent and Dependent Variables</i>	48
	<i>Active and Attribute Variables</i>	53
	Continuous and Categorical Variables	54
	Constructs, Observables, and Latent Variables	56
	Examples of Variations and Operational Definitions	57
	Chapter Summary	61
	Study Suggestions	62

Part Two	Sets, Relations, and Variance	63
Chapter 4	Sets	65
	Subsets 66	
	Set Operations 67	
	The Universal and Empty Sets; Set Negation 68	
	Set Diagrams 69	
	Set Operations with More Than Two Sets 70	
	Partitions and Cross Partitions 71	
	Levels of Discourse 74	
	Chapter Summary 77	
	Study Suggestions 78	
Chapter 5	Relations	81
	Relations as Sets of Ordered Pairs 82	
	Determining Relations in Research 85	
	Rules of Correspondence and Mapping 87	
	Some Ways to Study Relations 88	
	<i>Graphs</i> 88	
	<i>Tables</i> 88	
	<i>Graphs and Correlation</i> 92	
	<i>Research Examples</i> 95	
	Multivariate Relations and Regression 98	
	<i>Some Logic of Multivariate Inquiry</i> 98	
	<i>Multiple Relations and Regression</i> 100	
	Chapter Summary 101	
	Study Suggestions 101	
Chapter 6	Variance and Covariance	103
	Calculation of Means and Variances 104	
	Kinds of Variance 106	
	<i>Population and Sample Variances</i> 106	
	<i>Systematic Variance</i> 107	
	<i>Between-Groups (Experimental) Variance</i> 107	
	Error Variance 110	
	<i>An Example of Systematic and Error Variance</i> 111	
	<i>A Subtractive Demonstration: Removing Between-Groups Variance from Total Variance</i> 114	
	A Recap of Removing Between-Group Variance from Total Variance 117	
	Components of Variance 118	
	Covariance 119	
	<i>The Computer Addendum</i> 122	
	Chapter Summary 128	
	Study Suggestions 129	

Part Three	Probability, Randomness, and Sampling	131
Chapter 7	Probability	133
	Definition of Probability 134	
	Sample Space, Sample Points, and Events 135	
	Determining Probabilities with Coins 138	
	An Experiment with Dice 139	
	Some Formal Theory 141	
	Compound Events and Their Probabilities 143	
	Independence, Mutual Exclusiveness, and Exhaustiveness 145	
	Conditional Probability 150	
	<i>Definition of Conditional Probability</i> 150	
	<i>An Academic Example</i> 152	
	<i>Bayes' Theorem: Revising Probabilities</i> 155	
	<i>Example</i> 156	
	Chapter Summary 158	
	Study Suggestions 159	
Chapter 8	Sampling and Randomness	163
	Sampling, Random Sampling, and Representativeness 164	
	Randomness 167	
	<i>An Example of Random Sampling</i> 167	
	Randomization 169	
	<i>A Senatorial Randomization Demonstration</i> 171	
	Sample Size 175	
	<i>Kinds of Samples</i> 178	
	<i>Some Books on Sampling</i> 182	
	Chapter Summary 183	
	Study Suggestions 183	
	<i>Computer Program Listing to Generate Table 8.2</i> 186	
Part Four	Analysis, Interpretation, Statistics, and Inference	189
Chapter 9	Principles of Analysis and Interpretation	191
	Frequencies and Continuous 193	
	Rules of Categorization 194	
	Kinds of Statistical Analysis 198	
	<i>Frequency Distributions</i> 199	
	<i>Graphs and Graphing</i> 200	
	<i>Measures of Central Tendency and Variability</i> 202	
	<i>Measures of Relations</i> 203	
	<i>Analysis of Differences</i> 204	
	<i>Analysis of Variance and Related Methods</i> 205	
	<i>Profile Analysis</i> 207	
	<i>Multivariate Analysis</i> 208	

Indices	211
Social Indicators	213
The Interpretation of Research Data	214
<i>Adequacy of Research Design, Methodology, Measurement, and Analysis</i>	215
<i>Negative and Inconclusive Results</i>	216
<i>Unhypothesized Relations and Unanticipated Findings</i>	216
<i>Proof, Probability, and Interpretation</i>	218
Chapter Summary	219
Study Suggestions	219
Chapter 10 The Analysis of Frequencies	221
Data and Variable Terminology	223
Crosstabs: Definitions and Purpose	224
Simple Crosstabs and Rules for Crosstab Construction	225
Calculation of Percentages	227
Statistical Significance and the χ^2 Test	229
Levels of Statistical Significance	232
Types of Crosstabs and Tables	236
<i>One-Dimensional Tables</i>	236
<i>Two-Dimensional Tables</i>	237
<i>Two-Dimensional Tables, "True" Dichotomies, and Continuous Measures</i>	240
<i>Three- and k-Dimensional Tables</i>	240
Specification	241
Crosstabulations, Relations, and Ordered Pairs	243
<i>The Odds Ratio</i>	246
<i>Multivariate Analysis of Frequency Data</i>	247
<i>Computer Addendum</i>	248
Chapter Summary	253
Study Suggestions	254
Chapter 11 Statistics: Purpose, Approach, Method	257
The Basic Approach	257
Definition and Purpose of Statistics	258
Binomial Statistics	260
The Variance	262
The Law of Large Numbers	264
The Normal Probability Curve and the Standard Deviation	265
Interpretation of Data Using the Normal Probability Curve-Frequency Data	268
Interpretation of Data Using the Normal Probability Curve-Continuous Data	269
Chapter Summary	272
Study Suggestions	273
Chapter 12 Testing Hypotheses and the Standard Error	275
Examples: Differences Between Means	276
Absolute and Relative Differences	277

Correlation Coefficients	278
Hypothesis Testing: Substantive and Null Hypotheses	279
The General Nature of a Standard Error	282
A Monte Carlo Demonstration	283
<i>The Procedure</i>	283
<i>Generalizations</i>	285
<i>The Central Limit Theorem</i>	286
<i>The Standard Error of the Differences between Means</i>	287
Statistical Inference	290
<i>Testing Hypotheses and the Two Types of Errors</i>	291
The Five Steps of Hypothesis Testing	295
<i>Sample Size Determination</i>	295
<i>Example</i>	297
Chapter Summary	299
Study Suggestions	300
Part Five Analysis of Variance	305
Chapter 13 Analysis of Variance: Foundations	307
Variance Breakdown: A Simple Example	308
The t-Ratio Approach	312
The Analysis of Variance Approach	313
An Example of a Statistically Significant Difference	315
Calculation of One-Way Analysis of Variance	317
A Research Example	321
Strength of Relations: Correlation and the Analysis of Variance	322
Broadening the Structure: Post Hoc Tests and Planned Comparisons	327
<i>Post Hoc Tests</i>	328
<i>Planned Comparisons</i>	328
Computer Addendum	331
<i>t-Ratio or t-Test on SPSS</i>	331
<i>One-Way ANOVA on SPSS</i>	336
<i>Addendum</i>	340
Chapter Summary	340
Study Suggestions	341
Chapter 14 Factorial Analysis of Variance	345
Two Research Examples	346
The Nature of Factorial Analysis of Variance	350
The Meaning of Interaction	352
A Simple Fictitious Example	352
Interaction: An Example	359
Kinds of Interaction	362
Notes of Caution	365
Interaction and Interpretation	367

Factorial Analysis of Variance with Three or More Variables	368
Advantages and Virtues of Factorial Design and Analysis of Variance	371
Factorial Analysis of Variance: Control	372
Research Examples	374
<i>Race, Sex, and College Admissions</i>	374
<i>The Effect of Gender, Type of Rape, and Information on Perception</i>	375
<i>Student Essays and Teacher Evaluation</i>	376
Computer Addendum	377
Chapter Summary	384
Study Suggestions	385
Chapter 15 Analysis of Variance: Correlated Groups	387
Definition of the Problem	388
A Fictitious Example	389
<i>An Explanatory Digression</i>	390
<i>Reexamination of Table 15.2 Data</i>	393
<i>Further Considerations</i>	394
Extracting Variances by Subtraction	397
<i>Removal of Systematic Sources of Variance</i>	398
<i>Additional Correlated Analysis of Variance Designs</i>	400
Research Examples	403
<i>Ironie Effects of Trying to Relax Under Stress</i>	403
<i>Learning Sets of Isopods</i>	403
<i>Business: Bidding Behavior</i>	405
<i>Computer Addendum</i>	406
Chapter Summary	409
Study Suggestions	409
Chapter 16 Nonparametric Analysis of Variance and Related Statistics	413
Parametric and Nonparametric Statistics	414
<i>Assumption of Normality</i>	415
<i>Homogeneity of Variance</i>	416
<i>Continuity and Equal Intervals of Measures</i>	416
<i>Independence of Observations</i>	417
Nonparametric Analysis of Variance	418
<i>One-Way Analysis of Variance: The Kruskal-Wallis Test</i>	418
<i>Two-Way Analysis of Variance: The Friedman Test</i>	420
<i>The Coefficient of Concordance, W</i>	423
Properties of Nonparametric Methods	424
Computer Addendum	425
<i>The Kruskal-Wallis Test on SPSS</i>	425
<i>The Friedman Test on SPSS</i>	430
Chapter Summary	431
Study Suggestions	431

Part Six Designs of Research	435
Chapter 17 Ethical Considerations in Conducting Behavioral Science Research	437
Fiction and Reality	437
<i>A Beginning?</i>	439
<i>Some General Guidelines</i>	442
<i>Guidelines from the American Psychological Association</i>	443
<i>General Considerations</i>	443
<i>The Participant at Minimal Risk</i>	443
<i>Fairness, Responsibility, and Informed Consent</i>	444
<i>Deception</i>	444
<i>Debriefing</i>	444
<i>Freedom from Coercion</i>	445
<i>Protection of Participants</i>	445
<i>Confidentiality</i>	445
<i>Ethics of Animal Research</i>	446
Chapter Summary	447
Study Suggestions	448
Chapter 18 Research Design: Purpose and Principles	449
Purposes of Research Design	450
<i>An Example</i>	451
<i>A Stronger Design</i>	452
Research Designs as Variance Control	455
<i>A Controversial Example</i>	456
Maximization of Experimental Variance	459
Control of Extraneous Variables	460
Minimization of Error Variance	462
Chapter Summary	463
Study Suggestions	464
Chapter 19 Inadequate Designs and Design Criteria	465
Experimental and Nonexperimental Approaches	466
Symbolism and Definitions	467
Faulty Designs	468
<i>Measurement, History, Maturation</i>	470
<i>The Regression Effect</i>	470
Criteria of Research Design	472
<i>Answer Research Questions?</i>	472
<i>Control of Extraneous Independent Variables</i>	473
<i>Generalizability</i>	474
<i>Internal and External Validity</i>	475
Chapter Summary	478
Study Suggestions	479

Chapter 20	General Designs of Research	481
	Conceptual Foundations of Research Design	482
	A Preliminary Note: Experimental Designs and Analysis of Variance	484
	The Designs	485
	<i>The Notion of the Control Group and Extensions of Design 20.1</i>	486
	<i>Matching versus Randomization</i>	489
	<i>Matching by Equating Participants</i>	490
	<i>The Frequency Distribution Matching Method</i>	491
	<i>Matching by Holding Variables Constant</i>	492
	<i>Matching by Incorporating the Nuisance Variable Into the Research Design</i>	492
	<i>Participant as Own Control</i>	493
	Additional Design Extensions: Design 20.3 Using a Pretest	493
	Difference Scores	495
	Chapter Summary	499
	Study Suggestions	500
Chapter 21	Research Design Applications: Randomized Groups and Correlated Groups	501
	Simple Randomized Subjects Design	502
	<i>A Research Example</i>	502
	<i>Dolinski and Nawrat: Fear-then-Relief and Compliance</i>	502
	Factorial Designs	504
	<i>Factorial Designs with More than Two Variables</i>	505
	<i>Research Examples of Factorial Designs</i>	505
	<i>Sigall and Ostrove: Attractiveness and Crime</i>	506
	<i>Quilici and Mayer: Examples, Schema and Learning</i>	506
	<i>Example 1</i>	507
	<i>Example 2</i>	507
	<i>Example 3</i>	507
	<i>Example 4</i>	507
	<i>Hoyt: Teacher Knowledge and Pupil Achievement</i>	508
	Evaluation of Randomized Subjects Designs	510
	Correlated Groups	511
	<i>The General Paradigm</i>	512
	<i>Units</i>	513
	<i>One Group Repeated Trials Design</i>	513
	<i>Two groups, Experimental Group-Control Group Designs</i>	514
	Research Examples of Correlated Group Designs	515
	<i>Miller and DiCara: Learning of Autonomic Functions</i>	516
	<i>Tipper, Eissenberg, and Weaver: Effects of Practice on Selective Attention</i>	518
	Multigroup Correlated Groups Designs	519
	<i>Units Variance</i>	519
	Factorial Correlated Groups	520
	<i>Suedfeld and Rank: Revolutionary Leaders and Conceptual Complexity</i>	521
	<i>Perrine, Lisle, and Tucker: Offer of Help and Willingness to Seek Support</i>	522

	Analysis of Covariance	523
	<i>Clark and Walberg: Massive Reinforcement and Reading Achievement</i>	524
	Research Design and Analysis: Concluding Remarks	525
	Computer Addendum	526
	Chapter Summary	528
	Study Suggestions	529
Part Seven	Types of Research	533
Chapter 22	Quasi-Experimental and N = 1 Designs of Research	535
	Compromise Designs a.k.a. Quasi Experimental Designs	536
	<i>Nonequivalent Control Group Design</i>	536
	<i>No-Treatment Control Group Design</i>	537
	<i>Research Examples</i>	543
	<i>Nelson, Hall, and Walsh-Bowers: Nonequivalent Control Group Design</i>	543
	<i>Chapman and McCauley: Quasi-Experiment</i>	543
	<i>Time Designs</i>	544
	<i>Multiple Time Series Design</i>	546
	<i>Single Subject Experimental Designs</i>	546
	<i>Some Advantages of Doing Single-Subject Studies</i>	548
	<i>Some Disadvantages of Using Single-Subject Designs</i>	549
	Some Single-Subject Research Paradigms	550
	<i>The Stable Baseline: An Important Goal</i>	550
	<i>Designs that Use the Withdrawal of Treatment</i>	550
	<i>The ABA Design</i>	550
	<i>Repeating Treatments (ABAB Designs)</i>	551
	<i>A Research Example</i>	552
	<i>Powell and Nelson: Example of an ABAB Design</i>	552
	<i>Using Multiple Baselines</i>	553
	Chapter Summary	554
	Study Suggestions	555
Chapter 23	Nonexperimental Research	557
	Definition	558
	Basic Difference Between Experimental and Nonexperimental Research	558
	Self-Selection and Nonexperimental Research	560
	Large-Scale Nonexperimental Research	561
	<i>Determinants of School Achievement</i>	562
	<i>Response Style Differences between East Asian and North American Students</i>	563
	Smaller Scale Nonexperimental Research	564
	<i>Cochran and Mays: Sex, Lies, and HIV</i>	564
	<i>Elbert: Impaired Reading and Written Language in Attention Deficit Children</i>	565
	Testing Alternative Hypotheses	566
	Evaluation of Nonexperimental Research	568
	<i>The Limitations of Nonexperimental Interpretation</i>	568
	<i>The Value of Nonexperimental Research</i>	569

Conclusions	570
Chapter Summary	571
Study Suggestions	571
Chapter 24	Laboratory Experiments, Field Experiments, and Field Studies 575
A Laboratory Experiment: Miller Studies of the Learning of Visceral Responses	576
A Field Experiment: Rind and Bordia's Study on the Effects of a Server's "Thank You" and Personalization on Restaurant Tipping	577
A Field Study: Newcomb's Bennington College Study	578
Characteristics and Criteria of Laboratory Experiments, Field Experiments, and Field Studies	579
Strengths and Weaknesses of Laboratory Experiments	579
Purposes of the Laboratory Experiment	581
The Field Experiment	581
Strengths and Weaknesses of Field Studies	582
Field Studies	585
Types of Field Studies	586
Strengths and Weaknesses of Field Studies	586
Qualitative Research	588
Addendum	593
The Holistic Experimental Paradigm	593
Chapter Summary	595
Study Suggestions	596
Chapter 25	Survey Research 599
Types of Surveys	601
Interviews and Schedules	601
Other Types of Survey Research	603
The Methodology of Survey Research	604
Checking Survey Data	607
Three Studies	608
Verba and Nie: Political Participation in America	608
Docter and Prince: A Survey of Male Cross-Dressers	609
Sue, Fujino, Hu, Takeuchi, and Zane: Community Health Services for Ethnic Minorities	610
Applications of Survey Research to Education	611
Advantages and Disadvantages of Survey Research	613
Meta-Analysis	614
Chapter Summary	618
Study Suggestions	619
Part Eight	Measurement 621
Chapter 26	Foundations of Measurement 623
Definition of Measurement	625
Measurement and "Reality" Isomorphism	627

Properties, Constructs, and Indicants of Objects	629
Levels of Measurement and Scaling	630
Classification and Enumeration	631
Nominal Measurement	632
Ordinal Measurement	632
Interval Measurement (Scales)	634
Ratio Measurement (Scales)	635
Comparisons of Scales: Practical Considerations and Statistics	635
Chapter Summary	638
Study Suggestions	639
Chapter 27	Reliability 641
Definitions of Reliability	642
Theory of Reliability	645
Two Computational Examples	648
The Interpretation of the Reliability Coefficient	652
The Standard Error of the Mean and the Standard Error of Measurement	657
The Improvement of Reliability	659
The Value of Reliability	662
Chapter Summary	663
Study Suggestions	664
Chapter 28	Validity 665
Types of Validity	666
Content Validity and Content Validation	667
Criterion-Related Validity and Validation	668
Decision Aspects of Validity	669
Multiple Predictors and Criteria	670
Construct Validity and Construct Validation	670
Convergence and Discriminability	671
A Hypothetical Example of Construct Validation	672
The Multitrait-Multimethod Matrix Method	674
Research Examples of Concurrent Validation	676
Research Examples of Construct Validation	676
A Measure of Anti-Semitism	677
A Measure of Personality	677
The Measurement of Democracy	678
Other Methods of Construct Validation	679
A Variance Definition of Validity: The Variance Relation of Reliability and Validity	680
Statistical Relation between Reliability and Validity	684
The Validity and Reliability of Psychological and Educational Measurement Instruments	685
Chapter Summary	685
Study Suggestions	686

Part Nine	Methods of Observation and Data Collection	689
Chapter 29	Interviews and Interview Schedules	691
	Interviews and Schedules as Tools of Science	693
	<i>The Interview</i>	693
	The Interview Schedule	694
	<i>Kinds of Schedule Information and Items</i>	694
	<i>Fixed-Alternative Items</i>	695
	<i>Example</i>	695
	<i>Open-Ended Items</i>	695
	<i>Example</i>	696
	<i>Scale Items</i>	696
	<i>Criteria of Question-Writing</i>	697
	The Value of Interviews and Interview Schedules	699
	<i>The Focus Group and Group Interviewing: Another Interviewing Method</i>	700
	<i>Some Examples of Focus Group Research</i>	701
	Chapter Summary	702
	Study Suggestions	703
	<i>Classical Works</i>	703
	<i>More Recent Works</i>	703
	<i>"Normal" Studies</i>	704
Chapter 30	Objective Tests and Scales	707
	Objectivity and Objective Methods of Observation	708
	Tests and Scales: Definitions	709
	<i>Types of Objective Measures</i>	709
	<i>Intelligence and Aptitude Tests</i>	709
	<i>Achievement Tests</i>	710
	<i>Personality Measures</i>	711
	<i>Attitude Scales</i>	712
	<i>Value Scales</i>	715
	Types of Objective Scales and Items	716
	<i>Examples</i>	716
	<i>Agreement-Disagreement Items</i>	717
	<i>Rank Order Items and Scales</i>	718
	<i>Forced-Choice Items and Scales</i>	719
	<i>Ipsative and Normative Measures</i>	721
	Choice and Construction of Objective Measures	723
	Chapter Summary	724
	Study Suggestions	725
Chapter 31	Observations of Behavior and Sociometry	727
	Problems in Observing Behavior	728
	<i>The Observer</i>	728
	<i>Validity and Reliability</i>	729

	<i>Categories</i>	731
	<i>Units of Behavior</i>	731
	<i>Cooperativeness</i>	732
	<i>Observer Inference</i>	732
	<i>Generality or Applicability</i>	733
	<i>Sampling of Behavior</i>	734
	Rating Scales	736
	<i>Types of Rating Scales</i>	737
	<i>Examples</i>	737
	<i>Weaknesses of Rating Scales</i>	738
	Examples of Observation Systems	739
	<i>Time Sampling of Play Behavior of Hearing-Impaired Children</i>	739
	<i>Observation and Evaluation of College Teaching</i>	740
	Assessment of Behavioral Observation	741
	Sociometry	742
	<i>Sociometry and Sociometric Choice</i>	742
	<i>Example</i>	742
	<i>Example</i>	743
	<i>Methods of Sociometric Analysis</i>	743
	<i>Sociometric Matrices</i>	743
	<i>Sociograms or Directed Graphs</i>	745
	<i>Sociometric Indices</i>	746
	<i>Research Uses of Sociometry</i>	747
	<i>Prejudice in Schools</i>	748
	<i>Sociometry and Stereotypes</i>	748
	<i>Sociometry and Social Status</i>	748
	<i>Race, Belief, and Sociometric Choice</i>	748
	Chapter Summary	749
	Study Suggestions	751
Part Ten	Multivariate Approaches	753
Chapter 32	Multiple Regression Analysis: Foundations	755
	Three Research Examples	755
	Simple Regression Analysis	757
	Multiple Linear Regression	761
	<i>An Example</i>	761
	The Multiple Correlation Coefficient	768
	Tests of Statistical Significance	771
	<i>Significance Tests of Individual Regression Weights</i>	773
	Interpretation of Multiple Regression Statistics	773
	<i>Statistical Significance of the Regression and R^2</i>	773
	<i>Relative Contributions to Y of the Xs</i>	774
	Other Analytic and Interpretative Problems	777
	Research Examples	780
	<i>DDT and Bald Eagles</i>	780

	<i>Inflation Bias in Self-Assessment Examinations</i>	781
	<i>Multiple Regression Analysis and Scientific Research</i>	782
	Chapter Summary	783
	Study Suggestions	784
Chapter 33	Multiple Regression, Analysis of Variance, and Other Multivariate Methods	787
	One-Way Analysis of Variance and Multiple Regression Analysis	788
	Coding and Data Analysis	792
	Factorial Analysis of Variance, Analysis of Covariance, and Related Analyses	795
	<i>Analysis of Covariance</i>	796
	Discriminant Analysis, Canonical Correlation, Multivariate Analysis of Variance, and Path Analysis	799
	<i>Discriminant Analysis</i>	799
	<i>Canonical Correlation</i>	800
	<i>Research Examples</i>	802
	<i>Multivariate Analysis of Variance</i>	802
	<i>Path Analysis</i>	803
	Ridge Regression, Logistic Regression, and Log-linear Analysis	805
	<i>Ridge Regression</i>	805
	<i>The Problem with Ordinary-Least-Squares (OLS)</i>	806
	<i>Research Example</i>	808
	<i>Logistic Regression</i>	808
	<i>A Research Example</i>	810
	<i>Multiway Contingency Tables and Log-Linear Analysis</i>	811
	<i>Research Example</i>	816
	Multivariate Analysis and Behavioral Research	817
	Chapter Summary	818
	Study Suggestions	820
Chapter 34	Factor Analysis	825
	Foundations	826
	<i>A Brief History</i>	826
	<i>A Hypothetical Example</i>	827
	<i>Factor Matrices and Factor Loadings</i>	829
	<i>Some Factor Theory</i>	831
	<i>Graphical Representation of Factors and Factor Loadings</i>	833
	Extraction and Rotation of Factors, Factor Scores, and Second-Order Factor Analysis	834
	<i>The Communality and Number of Factors Problems</i>	835
	<i>The Principal Factor Method</i>	836
	<i>Rotation and Simple Structure</i>	839
	<i>Second-Order Factor Analysis</i>	844
	<i>Factor Scores</i>	845
	<i>Research Examples</i>	846

	<i>The Comrey Personality Scales</i>	846
	<i>Thurstone Factorial Study of Intelligence</i>	847
	<i>Fluid and Crystallized Intelligence</i>	847
	<i>Confirmatory Factor Analysis</i>	849
	<i>Research Example Using Confirmatory Factor Analysis</i>	851
	Factor Analysis and Scientific Research	854
	Chapter Summary	857
	Study Suggestions	858
Chapter 35	Analysis of Covariance Structures	863
	Covariance Structures, Latent Variables, and Testing Theory	864
	Testing Alternative Factor Hypotheses: Duality Versus Bipolarity of Social Attitudes	868
	Latent Variable Influences: The Full Eqs System	876
	<i>Setting Up the EQS Structure</i>	878
	<i>Research Studies</i>	880
	<i>Verba and Nie: Political Participation in America</i>	881
	<i>Brecht, Dracup, Moser, and Riegel: Relationship of Marital Quality and Psychosocial Adjustment</i>	882
	Conclusions—and Reservations	884
	Chapter Summary	887
	Study Suggestions	888
